

## FamoCrete

When damaged concrete is overhead it is necessary to have a product that won't drip and run before it cures.

FamoCrete's higher-viscosity formula allows it be trowelable and sag resistant.

## FamoCrete Benefits

FamoCrete is a rigid and sag resistant polyurethane that has been specially designed for the repair of broken or spalled concrete. It is extremely easy to apply and supplied in a ready-to-use universal cartridge. FamoCrete's non-sag formula makes it ideal for repairing concrete that is overhead or vertical, like a pillar or wall. One cartridge provides enough product to repair a little more than 14 linear feet and has a shelf life of more than one year when stored properly.

## Vertical and Horizontal Concrete Repair

## FamoCrete

### Where to use FamoCrete

- Walls – fill voids or patch defects
- Pillars – repairs damaged areas
- Sidewalks – fixes transitions or spalls
- Curbs – repairs broken or damaged areas
- Joints – supports and seals

FamoCrete repairs both horizontal and vertical concrete areas.

FamoCrete can be troweled level and abraded to match the surrounding area.
