

Polyurea Coatings

Our Polyurea Coatings are the ideal products for coating and sealing outdoors or when you are in need of a color-stable coating. With their excellent weathering characteristics and impact resistance, you can count on outstanding protection that will last and last.

Polyurea Coating Benefits

Our two-component polyureas have been specifically designed for use as floor coatings. The products can be used on multiple surfaces, including concrete, wood and metal. They perform well in extreme climates and have a high level of impact abrasion resistance, making them ideal for outdoor walkways. P-540, P-670, P-690 and P-695 are very easy to use and can be rolled, brushed or sprayed over the surface you would like to protect. One gallon of P-540 is sufficient for coating and sealing an area up to 230 square feet and P-670, P-690 and P-695 can cover an area up to 260 square feet. The shelf life for P-690 and P-695 is six months, where P-540 and P-670 can be stored up to one year.

Where to use Polyurea Coatings

- Floor coating – repairs smooth and aggregate-filled surfaces
- Topcoat – apply for color stability
- Protective coating – protects concrete, wood and metal
- Walkway surfaces – creates a slip-resistant surface when aggregate is added

P-690 protects your concrete floor and provides a slip-resistant surface.

What you can expect from Polyurea Coatings

- Color stability
- Fast cure time
- Flexible
- Superior strength
- Easy to use

Packaging

- 4 gallon kits
- 10 gallon (P-540 only)
- 100 gallon (P-540 only)
